

Econ River Launch Directions

Middle Econlockhatchee River 28 39' 19.06N 81 10 05.93W

CR 419 to Snow Hill Road: This section of the Econ River is characterized by narrow, high-banked, channels that alternate with broader river sections flowing through dense woods.

Launch #1 Directions: Launch from the CR 419 Bridge.

From the intersection of I-95 and SR 50 in Titusville, take SR 50 west about 18 miles to CR 419 (Chuluota Road). Follow Chuluota Road north until just before the Econ Bridge. From the parking area on the left, you can unload boats and carry them about 100 yards to the river. Take-out is at Snow Hill Road, approximately 10 miles downstream (see directions to Snow Hill Road below).

Lower Econlockhatchee River 28 40' 35.61N 81 06 51.61W

Snow Hill Road to SR 46/C.S. Lee Park: The paddling is easy on this 12-mile section from Snow Hill Road to SR 46 on the St. Johns River. The current is slow and no carry-overs are required. The riverbanks are high, sandy and shaded by oaks during the first part of the trip. The final two miles are on the open waters of the St. Johns River.

Launch #2 Directions: Launch from Snow Hill Road Bridge.

From the intersection of SR 50 and I-95 in Titusville, go west on SR 50 about 18 miles to CR 419 (Chuluota Road). Turn right on Chuluota Road and go north through Chuluota. On the north side of Chuluota, the road makes a big sweeping curve to the west. Just beyond the curve, look for the Traffic Signal and Snow Hill Road on the right. Turn right on Snow Hill Road and follow it to the Econ River. Launch site is on the East side by the bridge. After paddling, your take-out is at C.S. Lee Park, where the St Johns River crosses under SR 46, 11 miles west of the intersection of I-95 and SR 46.

Please visit a restroom prior to arrival. There are NO facilities at the launch sites.
